Mystery Attached to Tragic  
End Because of Absence  
of Weapons.

### THOR MAKES DISCOVERY.

After Over Failure to Return Last  
Night Oliver Brewer Starts Out This  
Morning in Search of Them and  
Once Upon Forms Frozen Stiff.

Mystery surrounds the killing of  
Miss Thorp, about 45 years old,  
of Cumberland, and her niece, Lila  
Thorp, 14 years old, daughter of Mr.  
Oliver Brewer of Layton. The  
bodies were found this morning  
in a field along a road near Perry-  
opolis to the river at Layton.

It is suspected  
the bodies lay together a short dis-  
tance from the road and in plain view  
of the girl's uncle, and it is con-  
sidered that the bodies had been  
placed there by the murderer.

The American Legion has been  
asked to handle the awarding of these  
certificates and while information has  
been lacking from state headquarters,  
the local post has gone ahead to ar-  
range tentative plans which will be  
carried out when further word is re-

## OVER 61,000 WORKS OF CARNEGIE LIBRARY CIRCULATED IN 1919

Fairy Tales Prove Popular Among  
Readers, Standing Fourth; Fiction  
Comes First.

Sixty-one thousand nine hundred  
ninety-nine volumes were circulated by  
the Carnegie Free Library during  
1919, according to the annual report  
of Miss Margaret Wattenman, the  
librarian. This is an increase over  
the previous year. The smallest cir-  
culation of the year was July 8, dur-  
ing the home-coming celebration when  
the minds of the public were on other  
matters than books. The library was  
closed most of the day.

Next to fiction in the number of  
works used came literature. Fairy  
tales were popular. They came third  
with a total of 2,805. History was  
fourth. The report in details shows  
the following:

Number of days open, 308; number  
of borrowers registered, 479; refer-  
ence and reading room attendance,

## SUGAR NOW PLENTIFUL

But Trouble With the Staff Is in the  
Price: Potatoes Also.

With the price of sugar at 20 to 25  
cents a pound, the shortage that made  
it impossible for the consumer to get  
more than two pounds at a time and  
only at limited times has suddenly  
come to an end. Twenty cents a  
pound is said to be the minimum price  
in Connellsville. This is nearly four  
times the price before the war and an  
advance of 50 per cent.

Potatoes are in short with sugar.  
They sell around 34 a bushel here. It  
is easier to do without potatoes than  
sugar, the housewife says.

girl as he offered to do in an affidavit  
submitted to the immigration authori-  
ties, although he has never seen her.  
Such a marriage, assuming he is an  
American citizen, would permit her to

## THREE TO SIX YEARS IN PEN FOR PRESTO HEAD; HIS AIDES GO TO REFORMATORY

Three to six years to the Western  
penitentiary for W. D. O'Donnell,  
promoter of the Presto Coal company,  
which was to operate in Stewart  
township near Ohioville, and inde-  
minate terms to Huntington reformatory  
for his accomplices, Emil E.  
Peters and John J. Yenick, were the  
sentences meted out to the men in  
court in Uniontown this morning by  
Judge E. R. Reppert. O'Donnell was  
also fined \$10,000.

While not fixing any time of im-  
prisonment for Peters and Yenick,  
Judge Reppert informed them they  
would be held as long as O'Donnell is  
a prisoner in the penitentiary.

The court severely censured the  
promoters. It was apparent from the  
start, he said, that it was their inten-  
tion to defraud those they had inter-  
ested of their hard-earned savings.  
The fact that they failed to realize  
anything on the venture did not con-  
done the offense, said Judge Reppert.

In the order of their guilt, the  
court named O'Donnell, Peters, Yen-  
ick. The defendants were charged with  
conspiracy to defraud and false pro-  
tense.

Charged with complicity in the theft

Deputy United States Marshal  
Thomas Joyce, the revenue officer  
making the arrest, arrived in Con-  
nellsville yesterday forenoon. He had  
two warrants, but as far as can be  
learned he secured only one. Whether  
the other is for a local man is a mat-  
ter of conjecture.

Furlong, it is charged, conspired  
with S. B. Miller of South Connellsville  
and David R. Taylor, a negro  
bar porter, to secure the liquor. Miller  
is out on \$10,000 bail and Taylor

Carnegie Steel Company  
May Reveal Others.

### THOUSAND ARE HOMELESS

Sixty Small Residences and Office  
Building Consumed in 15 Minutes  
Despite Efforts of Firemen; \$100,000  
Loss in New York Movie Plant.

PITTSBURGH, Jan. 31.—Five persons  
are known to have been burned to  
death early today when fire flamed by  
a high wind destroyed 60 hunks-  
houses occupied by employees of the  
Carnegie Steel company plant at  
Clairton on the Monongahela river, 15  
miles from Pittsburgh. An office build-  
ing was consumed.

The fire, thought to have started in  
a building used as a kitchen, entirely  
destroyed the 60 structures within  
15 minutes. More than 1,000 occu-  
pants of the houses, which were two-  
story frame buildings, were forced to  
flee in scanty attire.

The Clairton fire department, as-  
sisted by the fire fighters of the Car-  
negie plant, tried to control the blaze  
but the effort was fruitless. As soon  
as the fire had burned itself out fire-  
men started a search of the ruins and  
within a few minutes five bodies had  
been recovered. The search was con-  
tinued for it was impossible to ascer-  
tain if all other occupants of the  
houses had escaped.

Miss Leslie is cast in the role of Jeanne Sterling, a charming young girl from the country town of Cliffside, N. J. She comes to New York to visit with a girl friend. On arriving at the house she finds that her friend has left town. Heartbroken and alone, Joanne wanders to the park. Here she accidentally meets Forest Chenoweth, a wealthy young architect.

## Sherman-Stiveson Tire & Rubber Co.

Notice to stockholders of the Sherman-Stiveson Tire & Rubber Company of Scottdale and to those who contemplate buying stock in same. The above Company is now installing machinery and we are following our original plan of paying for everything as delivery is made. Our factory and property are paid for in full as well as the machinery we are installing. We will start the building of tires as soon as possible. It is the plan of the Company to put out the regular tire, a tire that is good for 5,000 miles or more, until our patent tire is tried out, which if found as good as it looks should make a land-slide of gold into the pockets of our stockholders.

The machinery we have purchased is of the same capacity and quality as other tire companies installed that have several times our capitalization. We have been offered 20,000.00 above the contract price of last May for this machinery which shows how rapidly this kind of machinery is advancing in value.

Why You Should Invest Now.

Because \$100.00 will purchase as much stock now as \$500.00 may later.

Because some other companies have 1000 stockholders to pay dividends to for each 100 we have.

Because some companies have given more stock away for promotion and patents than our entire capitalization.

Because we have a factory large enough to use our profits for dividends and not for putting up new buildings.

Because the advance in price of this stock may be announced at any time and your opportunity of buying at \$1.00 per share will be gone forever.

And Remember

When you invest your money with this Company you are putting it in something with a firm foundation, something that has been built from the ground up. Every step we have taken has been one of safety for our stockholders. We have not reached the position we are in today through borrowed capital but have paid the cash which has been furnished by our stockholders and when the machinery of this plant begins to operate it will be operating for the stockholders and not for the repaying of borrowed funds and interest on same.

The wise investor of today will look for a new Company whose future has every prospect of equalling or even surpassing past accomplishments and of all financial opportunities open today perhaps the safest and most conservative is the rubber tire business as everyone knows of the increased demand for this product.

We invite you to Scottdale to see our factory, see what we have, see what we are doing and remember what J. P. Morgan once said, THE FOUNDATION OF WEALTH IS THE FIRST ONE HUNDRED DOLLARS (\$100.00) WELL INVESTED. The holding of 250 shares entitles you to a 25% discount on tires.

## WILL BENEFIT BOTH.

The 250 employees of the West Penn Power company who have enrolled as students in special courses of instruction in the line of work they are pursuing afford proof that these young men are alive to their opportunities and have determined to make the most of their equipment by gaining fuller knowledge of the fundamental principles and the methods by which that knowledge may be applied to their daily work. At the same time they are giving rather effective dental to the statement so frequently heard these days that young people have little interest in their jobs, other than waiting for the whistle to blow and pay day to come, and are less about earning how better to serve their employer or to fit themselves for advancement.

This is unfortunately too true in the case of young men who have the false notion that merely filling a place is the sum of their obligations to their employers and themselves. But the young men who have taken up the courses provided by the West Penn company do not belong to that class. Appreciating the advantages that are to be obtained through a more intimate and broader knowledge they are applying themselves with a determination to better fit themselves for larger responsibilities. In the meantime they are acquiring greater skill through applying this knowledge from day to day while others, less ambitious, content to go along without intelligent effort in the direction of self-improvement.

It requires no gift of prophecy to foretell what, within a few years, will be the relative positions of the two groups of young men. Those who have earnestly sought to increase their knowledge and displayed an interest in their tasks will have been advanced to positions of trust and responsibility while the others will be drifting along day after day very much like the machines they have meantime been operating. To those who have no desire to acquire greater proficiency and skill than to perform certain operations the opportunity to obtain special instruction will, of course, make no appeal. To those who are wide awake and eager for better things and willing to give better service, as so many of the West Penn young men have shown themselves to be, the chance to secure instruction of the character provided by these courses will prove a boon.

The company will profit by the experiment much in excess of the cost in increased efficiency and intelligence of the employees pursuing the courses. There will be a bonus of compensation that can be measured definitely and precisely. The tangible results represented by a more lively interest of employees in their work will not be susceptible of measurement, but they will have a no less real value to both the company and its employees.

Both are therefore to be commended upon the innovation, not only for the direct benefits that will be derived but also for the incentive it will doubtless give other employers and employees to emulate the example set.

Although two arrests have been made of parties alleged to have had something to do with or knowledge of the spiriting away of 45 members of the Barleycorn family, no official statement is forthcoming as to the number still to be apprehended. The information also has been furnished that the family is still missing. Strangely missing, some persons are.

If like this morning tomorrow will offer a fine opportunity for a spirited walk to the churches in the crisp winter air.

If the new dairy enterprise co-operates to reduce the cost of living it will justify its name as well as the expectations of housewives.

Congressman Kendall, like other people who have been working at their jobs, has made good. That is why there is the same unanimity of sentiment in favor of his return to Congress as there is to keep very good men in the place he fills with credit.

Even if all the charges alleged against "Count" Von Forester, a one time resident of Connelville, are sustained, his achievements will still rank a poor second to the bold abduction of 45 members of a single family, in which there is a further reluctance to place the credit where it belongs.

Oil Boom in Sewickley.

3-WELL PROPOSITION—PROVEN TERRITORY.

Incorporating at \$5,000.00. 1700 Shares at \$5.00 Each.

CONTRACT FOR THE DRILLING NOW BEING LET.

What would you do if some prominent oil men offered you \$10,000 for your leases?

DRILL, OF COURSE.

My friends advise me to develop this proven territory myself and I have decided to incorporate a company under the laws of Pennsylvania to be known as

The Thein Oil &amp; Gas Co.

Our leases cover lands aggregating about 22 acres on the Elizabeth Thein farm, Sewickley Heights, lying in direct path and midway of the famous Grubbs oil field and the Hartle farm. Everyone knows the Grubbs field where one single well flowed about 3,000 barrels in 24 hours. We also have other leases on lands in the Little Sewickley Creek oil district, known as the Umbastetter property.

Producing wells all around us, some of them have been producing oil for over 25 years. Just take the Sevin in Phillips wells. I propose to drill first on the Thein farm and if we meet with success I will drill three wells there. Then we have about 157 acres of proven territory left near Sewickley Creek. We have the best of chances. There is oil in these parts.

Out of all wells drilled the percentage of dry holes are only 10 per cent. We are preparing to drill 3 wells. Two wells out of 3 should be producers, according to the laws of average. We are offering this stock for \$1.00 per share with limited amount to each investor, to 10 shares. Each investor will share equal and alike in each well. Earnings to be divided quarterly with investors. Remark if you recall when reading the Oil and Gas News it is always the small investment that makes the largest winnings, so why invest more than \$10.00. The Pratt Five Well Oil and Gas Company has completed rig on Pratt well No. 5 (500 feet from new ten million Philadelphia company producer) and turned it over to H. M. Peely, driller, who begins the journey to the Speculator and this week. Rig is being erected for Pratt well No. 1 in Versailles (near Foster stone house well) and drilling expected to begin shortly on this well.

The Pratt Five Well Oil and Gas Company, by these results in the course of four weeks, have demonstrated their honest intention to put their shareholders' money to the purpose they intended—the quick drilling of five gas or oil wells—the quicker the better.

The Pratt five well oil and gas company is headed by Frank Pratt, trustee, and H. M. Peely, secretary and treasurer, business men of McKeesport. It is a co-partnership of 15% share, which cover all charges for leases, promotion, rigs, drilling, connecting, etc. in short, all costs until the gas is delivered into the mains.

A few unsold shares remain at \$100 per share in all five wells. Present shareholders in the company are its best references. For further reference, write the National Bank of McKeesport.

## SCOTSDALE HIGH LOSES TO LOCALS IN HARD CONTEST

Connellsville and Visitors Mix  
It Held Until Locals  
Spurt in Lead.

Connellsville handed Scottdale somewhat of a setback last night at the high school when the local school quintet took the game, 24-22. Connellsville and Scottdale split even on the number of field goals, each team setting eight, but Driscoll scored two more points than did his opponent.

The game was exceptionally close throughout. Connellsville led at the end of the first quarter 9-8 and when the half whistle blew, Scottdale had taken the upper side, leading by two points 14-12.

In the third quarter Connellsville again took the lead, having the visitors by two points when the period ended.

In the finishing period of the game it was anybody's victory. Connellsville held the lead for a long time and then the score was tied. Scottdale broke ahead immediately afterwards. Connellsville tied again with a foul and a field goal. Then an Orange and Black forward dropped the winning goal through.

## EIGHTH GRADE WINS

Second Year Juniors Put It All Over  
Sophomores in Basketball Game.

Any doubt that basketball fever has a firm grip on the girls of the high school, would be removed by witnessing a game such as yesterday afternoon at the high school gym in which the eighth grade or second year class defeated the sophomores, 18 to 5. Maybe it wasn't professional playing, but there was nothing lacking in the quality of the contest starts put into it. And they take it very much to heart when they lose.

## ARE YOUNG EYES ALWAYS GOOD EYES?

By no means. A lot of people, though, think that they are. If you are a parent, and have children going to school, and you imagine that their eyes are all right just because they are young, you may be making a serious mistake. Because young eyes can be abnormal, and in thousands of cases are abnormal, and no one may know anything about it. Think what a handicap that means to a child. As we have often said before, parents should take nothing for granted about children's eyes.
